English / A2 Intermediate Mid

French / A1 Novice High, Intermediate Low

Korean / C2 Superior

Experience

1999 - 2005

ReMobile Inc I Mobilution Corp

Cellular phone Industry /Refurbished

I did a refurbishment business to import and repair used phones purchased through the Korean auction market. We used the method of repairing the original parts purchased through the local distributor, but sometimes we re-exported the as-is pcb board purchased at the auction to Hong Kong.

When SK Helio launched the U.S. market, I became a part of an MVNO and built a network of 120 dealers in Greater Chicago Area.

2006 - 2009

Ben & Electrics Inc / Hyundai Motor Maintenance Inc in GA

Electrical Industry /Supervising building code, Maintenance

I studied the books on electrical supervisor building code in 2006-2008.

As a team of Hyundai Motor's Alabama Maintenance Company, I worked as a manager of the electrical Department for a while.

I belonged to an electric company and worked on the field as an electrician for two years, which later became Generla Contractor and completed four dental clinics works.

2010 - 2022

Hiossen I Dentis I DIO implants I Genoray X-Ray & OPENCBCT

Dental Industry /Clinical Sales Consultant

At a few different places. Especially, in the dental industry. I'm a learned and Certified Dental X-Ray from SS Rayscan and Genoray. I also have experience with developing the financial solution for an engagement based on client requirements, developing business cases, and executing a CFO-targeted financial sale such as Marlin financing company. I led an average half-million-dollar contract a year, and now I own a company. I have experience designing and manufacturing surgical custom drill kits at the request of SGS Swiss implants company. This kit is one of the new treatments that help dentists safely and quickly deliver implants.

2020 - 2022

Northwestern University /Bootcamp 2021

Developer Industry /UX/UI Design, Cloud Practitioner

Currently, I'm coding right now. I made various apps. My app development ability, which I have studied for two and a half years, is intended to see the experience and knowledge that I have lived so far through online business. In that sense, coding makes me feel sure that flowers are blooming in my life as if the sun is setting.
